

Xiamen Ainety Garments Co., Ltd

Twenty years of knitting craftsmanship

Delivering global-quality products

About **Ainety**: Twenty years of intensive focus have built rich industry expertise

Xiamen Ainety Garments Co., Ltd. was established in 2006 and has specialized in the knitwear industry for two decades. The company integrates R&D, design, and production, operating a headquarters in Xiamen and a modern manufacturing facility in Longyan. With exceptional craftsmanship and innovative designs, it is committed to delivering high-quality knitwear products to clients worldwide, earning a strong reputation within the industry.

2006

Steady Growth · Continuous Innovation

2006

The company was established in Xiamen. Paving the way for the development of the knitwear manufacturing industry

1

2019

The Longyan Changting Branch Factory has been established. The dual-base layout has been established, enhancing production capacity.

3

2

2010–2018

Continuously expand equipment capacity and strengthen the technical team.

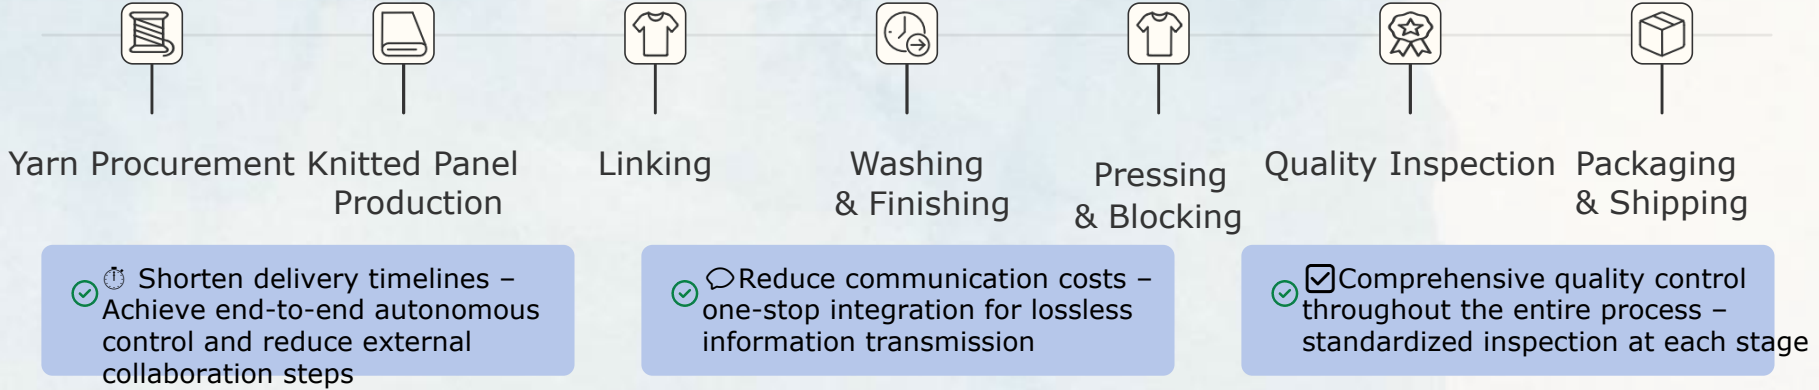

4

2020–present

Continuously upgrade smart devices and improve the quality management system. Serving global customers

One-stop production: From yarn to finished garments – fully automated control throughout the entire process

Quality First: Strict quality control throughout the entire process

Source Control: Carefully selecting suppliers and raw materials

We set strict supplier standards and test every batch of raw materials for composition, colorfastness and physical properties. This controls quality from the source, reduces risks and ensures full compliance with requirements.

Process Inspection: Dynamic Monitoring of Production Nodes

Our inspectors oversee all processes including knitting pieces, sewing and finishing. We conduct first article inspection and regular sampling, and promptly address defects to ensure full-process production quality control.

Final product inspection: 100% full inspection with zero defects

Comprehensive inspection upon outbound: verify dimensions, appearance, and manufacturing details. Strictly control every detail to ensure product quality.

Continuous Improvement: Closed-loop Tracking and Upgrades

Establish a comprehensive quality traceability system, regularly review and optimize production processes based on feedback data, and continuously enhance quality control management.

OEM/ODM Customization Services

Flexibly Meeting Brand Requirements

Custom Processing (OEM)

Accurately replicate customer design drawings and manufacturing specifications, with rigorous quality control at every stage—from fabric selection to final garment sewing—to ensure consistent excellence.

Private Label Production (ODM)

Leveraging robust R&D capabilities, we offer a diversified range of mature product solutions to help customers rapidly establish their own brands.

Small-batch, flexible customization

Overcome mass production barriers, support flexible orders for various styles and small batches, while balancing unique design with delivery efficiency.

Quick and Fast Sampling

Multiple sample testing teams are involved, with support from a stable yarn manufacturer; the sample preparation process takes approximately 2–7 days.

Comprehensive 3G–18G gauges, exceptional manufacturing

3G · 5G · 7G | Specialized Craftsmanship
Differentiated designs, designer styles, and high-value products.

12G · 14G | Core Production Capacity
High-Volume Best Sellers & Classic Business Collections

16G · 18G | Precision Manufacturing
Luxury Knitwear • High-Density Knits

2/120 Fine-Spun Yarn • 18 Precision Knitting
Refined Texture & Premium Feel

Why do global brands choose Ainety?

20 Years of Knitting Expertise
